MODERN FURNITURE DESIGN, LONDON

Stack Side Table and Stool

DESIGN LAUNCH | AUGUST 2018

The Stack side table and stool is the first piece to be shown from the new design collection of furniture from Thackeray West Design Studio. The pieces are primarily made from natural materials with a neutral palette, and the simple silhouette shapes have a collective elegance that unifies the range. The initial range consists of side tables, chairs and lights with more designs in development.

The design for the Stack table originates from a flat sheet which has been cut and folded to create a

complex 3D shape. The open spaces are as prominent as the solid shapes, and reflect the shape of the circular table tops stacking on top of one another, making silhouette shapes appear different from every angle. These light occasional tables can also be used as stools for extra seating when needed, and by stacking them they can be easily stored when not in use.

The tables are made in solid oak with steam bent legs and they are finished in satin varnish, or painted in a selection of neutral colours.

“ They become even more visually interesting as the stools stack on top of one another and the spaces seen through change from every angle. ”

ABOUT THE NEW COLLECTION

More of the range can be previewed on the website www.thackeraywest.co.uk and the rest of the pieces will be showcased over the coming months. Thackeray West Studio are currently looking for potential manufacturers to produce the pieces in the collection, and can be contacted through their website by anyone interested to hear more from them.
